ABOUT ME

I'm a very happy, outgoing and generally knowledgeable person. I have a big interest in computers, programming and other tech, I'm also interested in hunting and like physical challenges as well as being out in nature. At the moment I'm studying my fourth consecutive year at Chalmers University of Technology, and currently on my first year of my masters in high performance computer systems.

EXPERIENCE

Production Manager | McDonald's

September 2018 – August 2020

Katrineholm, Sweden

At McDonald's I worked mainly in the kitchen and did all the tasks that came with the position, such as making sure there are thawed ingredients, all machines are clean and operational and cooking the food. I'm also educated in all the service areas and manned the register, picked orders and took care of the drive-through. I have a finished education as production manager which means I'm qualified to educate new personnel, as well as a started education as shift manager.

Customer Service Agent | Volvo Car Retail (Consultant - Manpower)

May 2022 – September 2022

Gothenburg, Sweden

Here I was employed by Volvo Car Retail as a consultant from Manpower. I worked at the facility Volvo Car Sörred in the Torslanda area. In the facility we had both retail of new and used cars as well as a workshop and car rental. My tasks as a customer service agent involved a very broad work area with a lot of problem solving and customer service. I manned the "reception" to the facility and was the first point of contact for anyone entering for any purpose. From there it was my responsibility to make sure the customer gets the help they need or sees the right person. A usual day could include things such as, ordering extra parts, making a workshop reservation, receiving and giving out rental cars as well as arranging test drives of both new and used cars.

Gothenburg Representative | Wanda Sweden

October 2022 –

Gothenburg, Sweden

Wanda opened their first warehouse in Gothenburg in October of 2022 and I was the first on-site employee. I have since had the main responsibility for our operations here in Gothenburg as the rest of the personnel - including my nearest boss - is based in Stockholm. My responsibilities aside from the regular work has been educating new employees as well as making sure everything around the warehouse and our services works and keeping my closest boss updated. Since August of 2023 I have also had the responsibility of route planning/capacity management for all of our warehouses in Sweden.
